

# FIBER INSTALLATION EQUIPMENT. TRAINING. SUPPORT.

The fiber industry is growing exponentially, but it takes more than a drill to succeed. It takes partnering with an experienced leader that understands the demands of the ever-changing market. At Ditch Witch®, we'll not only supply you with the right equipment, but we'll provide your crews with the training and ongoing support to help you efficiently and safely install the next generation of fiber technology.

## DROP WORK FIBER INSTALLATION

Also known as fiber to the premise, this is the fiber conduit from main line to a specific home or building. Requires maneuverable equipment in tight areas.

JT5 Directional Drill

JT10 Directional Drill

410SX Vibratory Plow

Zahn® Vibratory Plow

## MAIN LINE / BACKBONE FIBER INSTALLATION

This is the fiber loop for a specific area. It is connected to the long-haul line and serves as the branching off point for neighborhoods and commercial districts.

JT20 Directional Drill

JT30 All Terrain Directional Drill

MT12 Microtrencher

HX75 Vacuum Excavator

## LONG-HAUL FIBER INSTALLATION

Long-haul fiber installation connects one city with another. It requires equipment that delivers mile after mile of reliable, efficient operation.

RT125 Quad

JT24 Directional Drill

AT40 All Terrain Directional Drill

MR90 Mud Recycler

## UTILITY VERIFICATION

Potholing, or soft excavation, uncovers buried utilities to visibly confirm their locations before excavating, minimizing the risk of damage.

MV800 Mud Vacuum

HX30 Vacuum Excavator

FXT50 Vacuum Excavator

FXT65 Air Vacuum Excavator

## TRAINING

We get crews ready, plain and simple. Ask your Ditch Witch® dealer what the best training program in the industry can do for your crews. It's flexible: with instruction available **online, in the classroom, on the simulator, on the equipment, or on the jobsite**. It's invaluable: with years of product experience packed into easy-to-understand lessons. And it's exclusively Ditch Witch: nobody offers this level of training with so many choices.

## SUPPORT

When we say we want to be your fiber partner, we mean it. We will stay with you after your purchase and provide you with ongoing support and service for all of your fiber installation jobs. That way you can approach every project with confidence knowing that we'll be standing shoulder-to-shoulder with you when you need us.

## SAFETY

Safety is always our first priority. Which is why we provide you with proper equipment operation training and fiber installation jobsite best practices.

## FINANCE

We know the fiber market. So we know what it takes to get started. Ask about QuickStart Financing to get your crew up and running in no time.
